EDUCATION

Ho Chi Minh City University of Technology, VNU-HCM <i>Bachelor of Science in Computer Science</i> - GPA: 3.2/4.0 (8.1/10) - OISP Scholarship, Semester 242 - Relevant Coursework: Data Structures and Algorithms, Computer Network, Mobile Application Development, Discrete Mathematics, Database Systems, Software Engineering, Operating Systems, Software Architecture	Ho Chi Minh City, Vietnam <i>Oct 2022 — Present</i>
--	--

CERTIFICATIONS

IELTS 7.0 , IDP Vietnam	May 2022
SQL Associate Certificate , Datacamp	Aug 2026

EXPERIENCE

Undergraduate Research Assistant Data Science Lab, HCMC University of Technology Implemented and trained convolutional neural network models for object detection in surveillance camera scenarios.	Sep 2024 — Feb 2025 <i>Ho Chi Minh City, Vietnam</i>
Independent Software Developer Independent Contributed to open-source repositories through code reviews, issue triaging, and technical discussions on GitHub.	Jan 2025 — Present <i>Ho Chi Minh City, Vietnam</i>

PROJECTS

Intelligent Restaurant Management System Technologies: React, TypeScript, NestJS, PostgreSQL, Docker - Developed a full-stack restaurant management platform for menu management, order processing, table workflows, and administrative operations. - Implemented backend APIs and database models to support restaurant staff workflows and customer-facing features. - Built responsive frontend interfaces for managing restaurant data, orders, and operational status.	Jan 2026 — June 2026
Mobile Museum Companion Technologies: SwiftUI, NestJS, PostgreSQL, ChromaDB - Built a mobile museum companion application for artwork discovery, guided tours, saved items, and museum navigation support. - Developed mobile screens, backend APIs, authentication flows, and database integration for artwork and tour management. - Integrated semantic search and AI-assisted recommendation features using vector database workflows.	Feb 2026 — May 2026
Simple Noise Protocol Implementation Technologies: Python, Websocket, POSIX - Implemented a simplified secure communication protocol based on the Noise Protocol Framework. - Developed core cryptographic message flow components, including handshake logic, key agreement, encryption, and authenticated message exchange.	Apr 2026 — Present
Library Management System Technologies: .NET, FastAPI, React, PostgreSQL, MongoDB, Docker - Designed and developed a university library management system for borrowing, returning, catalog search, and user management. - Applied layered architecture to improve maintainability, modularity, and separation of concerns. - Validated frontend workflows and backend APIs using Selenium and Postman.	Sep 2025 — Dec 2025
Computer Hardware Benchmarking using Statistical Learning Approaches Technologies: R, Python, Pandas, NumPy, scikit-learn, Matplotlib	June 2024 — Feb 2026

- Built a hardware benchmarking analysis workflow using R, later extended into a Python 3 data-processing pipeline.
- Applied statistical learning methods to analyze benchmark results, compare hardware performance, and identify performance patterns.
- Processed experimental benchmark data and generated visualizations to support performance interpretation and reporting.

Bank Account Management System

Sept 2025 — Jan 2026

- **Technologies:** React, TypeScript, NextJS, Tailwind CSS
- Worked as a frontend developer on a banking account management system focused on user account workflows and transaction interfaces.
- Built responsive frontend screens for account overview, transaction history, balance display, and user interaction flows.
- Integrated frontend components with backend APIs and validated user-facing behavior through manual testing and debugging.

EXTRACURRICULAR ACTIVITIES

BK-FC Trần Hưng Đạo High School

Nov 2022 --- June 2023

- Provided admissions counseling for high school students, helping them explore university programs, major choices, application pathways, and sharing campus life.

Youth Union Secretary, CC22KHM1

2022 --- 2026

- Led class-level Youth Union coordination, including student communication, activity planning, administrative support.

SKILLS

- **Languages:** Python, C/C++, JavaScript, TypeScript, Swift, SQL, R, HTML/CSS
- **Frameworks:** React, Next.js, Node.js, Express.js, NestJS, FastAPI, .NET, Tailwind CSS, PyTorch, NumPy, Pandas, Matplotlib, scikit-learn
- **Tools:** Git, Docker, Postman, Selenium, Railway, Render, AWS, Firebase, Azure, Jira, GitHub, GitLab, Figma, Google Colab, Apache Kafka, Langchain, Antigravity
- **Databases:** PostgreSQL, MySQL, MongoDB, ChromaDB
